

## HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [New York Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

## New York Serves a High-Risk Population

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 80.7% of households were low income
- 16.4% of households reported a history of child abuse or maltreatment
- 12.4% of households included pregnant teens

Evidence-Based Home Visiting Models in New York

[Healthy Families America \(HFA\)](#)

[Nurse-Family Partnership \(NFP\)](#)

## New York Performance Highlights

- **Depression Screening:** 98.4% of caregivers enrolled in home visiting were screened for depression within 3 months of enrollment or within 3 months of delivery
- **Intimate Partner Violence (IPV) Screening:** 92.8% of caregivers enrolled in home visiting were screened for IPV within 6 months of enrollment
