

HRSA's Maternal, Infant, and Early Childhood Home Visiting (MIECHV) Program

- Supports the [Ohio Home Visiting Program](#) and provides voluntary, evidence-based home visiting programs for at-risk pregnant women and families with children through kindergarten entry
- Builds upon decades of scientific research showing that home visits by a nurse, social worker, early childhood educator, or other trained professional during pregnancy and in the first years of a child's life helps prevent child abuse and neglect, supports positive parenting, improves maternal and child health, and promotes child development and school readiness

Ohio Serves a High-Risk Population

MIECHV Program awardees serve high-risk populations. Awardees tailor their programs to serve populations of need within their state.

- 94.2% of households were low income
- 9.8% of households included pregnant teens
- 27.3% of households included someone with low student achievement

Evidence-Based Home Visiting Models in Ohio

[Nurse-Family Partnership \(NFP\)](#)

Ohio Performance Highlights

- **Behavioral Concern Inquiries:** Caregivers were asked if they had any concerns regarding their child's development, behavior, or learning in 100% of postpartum home visits
- **Postpartum Care:** 94.1% of mothers enrolled in home visiting received a postpartum visit with a healthcare provider within 8 weeks of delivery
- **Integrated Data System:** Launched a new data system which serves as a statewide, web-based data system, electronic health record, and financial system that enables state and local level leaders to drive progress toward performance measures and other targeted services outcomes
